

# Abdulelah Alluqmani

Computer Science Graduate

Yanbu, Saudi Arabia | Abdulelah.alluqmani@gmail.com | +966553602170 | [abdulelah.it.com](http://abdulelah.it.com)

## PROFESSIONAL SUMMARY

Computer Science graduate from Yanbu Industrial College with hands-on experience in full-stack web development (Laravel, PHP, JavaScript) and AI-based solutions (Python, NLP). Currently completing an IT co-op at Saudi Energy Company while building toward a career in AI and automation development.

## EXPERIENCE

### IT Co-op / Helpdesk Intern — Saudi Energy Company

June 2026 – Present

- Provide IT helpdesk support, resolving hardware, software, network, and access-related issues for employees
- Gained hands-on exposure to enterprise IT operations and ticketing workflows in a large energy-sector organization
- Identified recurring support gaps that shaped an AI-based ticketing system proposed as a capstone project

## EDUCATION

### Bachelor of Computer Science — Yanbu Industrial College | Graduated: June 2026

## PROJECTS

### AI Helpdesk Ticket System (RAG-Based) — Python, LLM/RAG, Flask

- Designing an AI-first IT ticketing system using Retrieval-Augmented Generation (RAG) over internal docs/FAQs, with a one-click 'talk to a human' escalation option
- Building confidence-based auto-escalation, automatic ticket category tagging (network/hardware/access/software), and post-resolution satisfaction ratings
- Planning a filtered 'needs help' queue, live-chat spectating for staff before escalation, and hidden per-ticket AI summaries for faster handoffs

### Freelancer Web Platform — Laravel, PHP, Bootstrap, CSS

- Developed a full-stack freelance marketplace where clients post jobs and freelancers submit bids
- Implemented an automated email notification system based on freelancer skill matching
- Built the backend logic and database structure entirely using Laravel

### AI Hotel Search System (NLP-Based) — Python, Flask, NLP

- Built an intelligent hotel search system using Natural Language Processing to parse queries like "hotels in Medina under 500 SAR"
- Implemented filtering based on price, rating, and location

### Library Management System — HTML, CSS, JavaScript, PHP

- Developed a system for students to borrow books and for admins to manage inventory
- Implemented tracking for borrowed books and user management features

### Game Selling Websites (2 Projects) — HTML, CSS, JavaScript, jQuery

- Designed and developed two responsive websites for selling games, focused on UI, product display, and navigation

## SKILLS

**Programming Languages:** Java, JavaScript, Python, PHP

**Web Technologies:** HTML, CSS, jQuery, Bootstrap

**Frameworks & Tools:** Laravel, GitHub, Linux

**Other Skills:** Artificial Intelligence (NLP), Networking

## CERTIFICATIONS

Digital Forensics & Incident Response and OT Security Workshop
